Important recommendations

Before attempting any installation work, it is very important to verify how much space is available to fit the speakers into the vehicle.

Key points:

- For direct replacement of original speakers, please check there is enough space for your new Focal speakers and grilles.
- Ensure the speaker is clean from debris and metallic particles that maybe attached (especially after drilling)
- Do not touch the tweeter cone.

2-way kits connections

Specifications

170 V	
Type	2-way kit
Diameter	6 ^{13/16} " (172,9mm)
Maximum power	120W
Nominal power	60W
Sensitivity (2.83 V/1 m)	91dB
Frequency response	60Hz – 20kHz
Impedance	4 ohms
Fitting diameter	5 ^{1/2} " (140mm)
Mounting depth	2 ^{1/4} " (57mm)

Your Focal-JMLab product was developed and manufactured with high-quality materials and components which can be recycled and/or re-used. This symbol indicates that electrical and electronic equipment must be disposed of separately from normal garbage at the end of its operational lifetime. Please dispose of this product by bringing it to your local collection point or recycling centre for such equipment. This will help to protect the environment in which we all live.

How can you improve the sound quality of your speakers?

Easy. To improve the sound quality of your speakers notably those installed into the doors, Focal has the answer. Known as "Plain-Chant", this material acts as a sound absorber, to effectively reduce unwanted resonances and ensure your speakers produce a more full sound. No-fuss installation ensures this accessory, proves to be a real asset for your Focal speakers/installation. Consult your Focal retailer for further information /advise.

Which power for your amplifier?

These speakers are already highly efficient, with improved sensitivity. Therefore, their use with a high power head unit will produce comfortable listening pleasure.

However, if used with a more high-end system, with Focal amplification, the audio quality will be greatly improved. It is very important to ensure that the rated power of the amplifier suits the speakers used. Otherwise, your speakers may distort or possible damage may occur.

Always consult the owners manual of the principal source (head unit/amplifier), to ensure the power rating is compatible. A safe guide is to ensure the maximum power of the amplifier is not greater than the nominal power of the speakers.

Installation upgrade (with the help of a subwoofer)

If you want your system to have bass, with real punch and power, we recommend the inclusion of a subwoofer. This will greatly improve your listening pleasure and give your system, some real physical dimension.

Focal has therefore developed a range of subwoofer drivers and complete subwoofer systems, to compliment your Polyglass speakers.

Consult your local dealer, or check out these exciting products on the Focal Internet site : www.focal-fr.com.
